# AUTHOR INDEX

AfanMM
**Afanasiev, M. M.**
Control of seedling diseases of sugar beets with Dexon and Dexon-PCNB mixture ..... 12(2) 173

AlleHp
**Alley, Harold P.**
Effect of incorporation methods and carrier type of endothal (TD-66) on control of weeds in sugar beets ..... 12(2) 127

AntogJ
**Antognini, J.**
Experimental and commercial results with Tillam for weed control in sugar beets ..... 12(2) 94

BarmRD
**Barmington, R. D.**
Trends in sugar beet planter design in Colorado ..... 12(2) 141

BarrWW
**Barr, W. W.**
Lagooning and treatment of waste water ..... 12(3) 181

BayeDE
**Bayer, D. E.**
Postemergence weed control in sugar beets under California conditions ..... 12(7) 564

BeckCF
**Becker, Clarence F.**
Effect of incorporation methods and carrier type of endothal (TD-66) on control of weeds in sugar beets ..... 12(2) 127

BennCW
**Bennett, C. W.**
Occurrence of yellows resistance in the sugar beet with an appraisal of the opportunities for developing resistant varieties ..... 12(6) 503
Highly virulent strains of curly top virus in sugar beet in western United States ..... 12(6) 515

BennWH
**Bennett, W. H.**
Effect of soil moisture, nitrogen fertilization, variety, and harvest date on root yields and sucrose content of sugar beets ..... 12(3) 233

BernWO
**Bernhardt, W. O.**
The sphere photometer ..... 12(2) 106

BichSE
**Bichsel, S. E.**
An improved paper chromatography method of the determination of raffinose and kestose in beet root samples ..... 12(5) 449
Insecticide residue in sugar beet by-products ..... 12(3) 255

BroaCE
**Broadwell, C. E.**
Control of Cercospora leaf spot of sugar beets with protective fungicides ..... 12(2) 91

BushHL
**Bush, H. L.**
Correlations of pre-harvest samples and cultural practices with final yield and quality of sugar beets ..... 12(4) 273

CarpFG
**Carpenter, Frank G.**
Status of sugar color and turbidity measurements ..... 12(4) 326

CarruA
**Carruthers, Albert**
A review of recent developments in the chemistry of sugar beet ..... 12(1) 31

CaryEE
**Cary, E. E.**
Yield and quality of sugar beets as affected by cropping systems ..... 12(6) 492

CostGL
**Costel, Gerald L.**
Effect of incorporation methods and carrier type of endothal (TD-66) on control of weeds in sugar beets ..... 12(2) 127

DaviJF
**Davis, J. F.**
The effect of phosphate applications on soil tests and on subsequent yield of field beans and wheat ..... 12(4) 284
The interaction of rates of phosphate application with fertilizer placement and fertilizer applied at planting time on the chemical composition of sugar beet tissue, yield, percent sucrose, and apparent purity of sugar beet roots ..... 12(3) 259

DeitVR
**Deitz, Victor R.**
Status of sugar color and turbidity measurements ..... 12(4) 326

DextST
**Dexter, S. T.**
Influence of inhibitors in sugar beet fruits on speed of germination at 50 and 70 degrees Fahrenheit ..... 12(7) 608
Winter protection of piled sugar beet roots ..... 12(6) 455

DoxtCW
**Doxtator, C. W.**
Variety crosses in sugar beets (*Beta vulgaris* L.)
I. Expression of heterosis and combining ability ..... 12(7) 573
Variety crosses in sugar beets (*Beta vulgaris* L.)
II. Estimation of environmental and genetic variances for weight per root and sucrose percent ..... 12(7) 585
Variety crosses in sugar beets (*Beta vulgaris* L.)
III. Estimating the number and proportion of genetic deviates by the partitioning method of genetic analysis ..... 12(7) 592
Application of the shortcut method for estimating the standard deviation ..... 12(7) 635
Processing and drill performance of monogerm beet seed ..... 12(4) 301
Selection for seed size in monogerm varieties ..... 12(3) 268
Selection for low and high aspartic acid and glutamine in sugar beets ..... 12(2) 152
Chemical control of Cercospora leaf spot in sugar beets ..... 12(1) 43

DyerHC
**Dyer, Harold C.**
Cost reduction through instrumentation improvement in steam balance, fuel savings and other material savings ..... 12(6) 471

EisFG
**Eis, F. G.**
Control of yeasts in sucrose syrup by control of syrup pH ..... 12(4) 359
Dual laboratory continuous Dorr system first carbonation apparatus ..... 12(3) 249
The sphere photometer ..... 12(2) 106

FaruDE
**Farus, D. E.**
Chemical control of Cercospora leaf spot in sugar beets ..... 12(1) 43

FedeWT
**Federer, W. T.**
Chemical genetic and soils studies involving thirteen characters in sugar beets ..... 12(5) 393

FerrGV
**Ferry, G. V.**
Marginal nitrogen deficiency of sugar beets and the problem of diagnosis ..... 12(6) 476

FifeJM
**Fife, J. M.**
Growth rate of young sugar beets as a measure of resistance to virus yellows 12(6) 497

FinkRE
**Finkner, R. E.**
Effect of plant spacing and fertilizer on yield, purity, chemical constituents and evapotranspiration of sugar beets in Kansas.
I. Yield of roots, purity, percent sucrose and evapotranspiration ..... 12(8) 686
Effect of plant spacing and fertilizer on yield, purity, chemical constituents and evapotranspiration of sugar beets in Kansas.
II. Chemical constituents ..... 12(8) 699
Variety crosses in sugar beets (*Beta vulgaris* L.)
I. Expression of heterosis and combining ability ..... 12(7) 573

Variety crosses in sugar beets (*Beta vulgaris* L.)
II. Estimation of environmental and genetic variances for weight per root and sucrose percent ... 12(7) 585
Variety crosses in sugar beets (*Beta vulgaris* L.)
III. Estimating the number and proportion of genetic deviates by the partitioning method of genetic analysis ... 12(7) 592
Application of the shortcut method for estimating the standard deviation ... 12(7) 635
Effect of nitrogen fertilization on yield and quality of sugar beets ... 12(6) 538
Selection for low and high aspartic acid and glutamine in sugar beets ... 12(2) 152
Chemical control of Cercospora leaf spot in sugar beets ... 12(1) 43

FordHP
**Ford, H. P.**
Postemergence weed control in sugar beets under California conditions ... 12(7) 564

ForsFR
**Forsyth, F. R.**
Cultural and pathogenic studies of an isolate of *Cercospora beticola* Sacc. ... 12(6) 485
Control of Cercospora leaf spot of sugar beets with protective fungicides ... 12(2) 91

Foy, CL
**Foy, C. L.**
Postemergence weed control in sugar beets under California conditions ... 12(7) 564

FrakMG
**Frakes, M. G.**
Winter protection of piled sugar beet roots ... 12(6) 455

FrieRE
**Friehauf, R. E.**
Correlations of pre-harvest samples and cultural practices with final yield and quality of sugar beets ... 12(4) 273

GaddRS
**Gaddie, Robert S.**
Wet screening of sugar crystals from low purity massecuites and sugars ... 12(3) 251
Process liquor color determination in the sugar factory control laboratory ... 12(3) 253

GaleF
**Gale, F.**
Effect of solids recirculation on purification of raw juices ... 12(5) 378

GaskJO
**Gaskill, John O.**
Sugar-beet root aphid resistance in sugar beet ... 12(7) 571
Comparison of fluorescent and incandescent lamps for promotion of flowering in sugar beet seedlings ... 12(7) 623
Influence of age and supplemental light on flowering of photothermally induced sugar beet seedlings ... 12(6) 530

GaughP
**Gaugh, Park**
Instrument maintenance in the sugar factory ... 12(6) 468

GoodAE
**Goodban, A. E.**
Salt elimination during diffusion of sugar beets ... 12(3) 238

GossJR
**Goss, J. R.**
Electrostatic separation of cysts of the sugar beet nematode ... 12(2) 100

GrimDW
**Grimes, D. W.**
Effect of plant spacing and fertilizer on yield, purity, chemical constituents and evapotranspiration of sugar beets in Kansas.
I. Yield of roots, purity, percent sucrose and evapotranspiration ... 12(8) 686
Effect of plant spacing and fertilizer on yield, purity, chemical constituents and evapotranspiration of sugar beets in Kansas.
II. Chemical constituents ... 12(8) 699

HaddJL
**Haddock, Jay L.**
The influence of factors other than soluble phosphorus in the nutrient medium on the phosphorus content of sugar beet plants ... 12(8) 641

HallCW
**Hall, Carl W.**
Sugar beet mechanization in the U.S.S.R. ... 12(1) 53

HallDH
**Hall, D. H.**
Response of sugar beet to date of planting and infection by yellows viruses in northern California ... 12(3) 210

HanzPC
**Hanzas, P. C.**
Selection for low and high aspartic acid and glutamine in sugar beets ... 12(2) 152

HarpAM
**Harper, A. M.**
A technique for obtaining identical pairs of seedling beets ... 12(7) 614
Effect of defoliation and reduction of stand on yield of sugar beets in southern Alberta ... 12(3) 192
The sugar beet nematode, *Heterodera schachtii* Schmidt, in southern Alberta ... 12(2) 148

HarrWA
**Harris, W. A.**
Simplicity in analytical methods ... 12(3) 245
Determination of amino nitrogen, pyrrolidone carboxylic acid nitrogen, and total nitrogen with ninhydrin ... 12(3) 200

HawnEJ
**Hawn, E. J.**
The sugar beet nematode, *Heterodera schachtii* Schmidt, in southern Alberta 12(2) 148

HeckRJ
**Hecker, Richard J.**
Use of tetrazolium salts in determining viability of sugar beet pollen ... 12(6) 521

HelmRH
**Helmerick, R. H.**
Variety crosses in sugar beets (*Beta vulgaris* L.)
I. Expression of heterosis and combining ability ... 12(7) 573
Variety crosses in sugar beets (*Beta vulgaris* L.)
II. Estimation of environmental and genetic variances for weight per root and sucrose percent ... 12(7) 585
Variety crosses in sugar beets (*Beta vulgaris* L.)
III. Estimating the number and proportion of genetic deviates by the partitioning method of genetic analysis ... 12(7) 592
Application of the shortcut method for estimating the standard deviation ... 12(7) 635
Selection for seed size in monogerm varieties ... 12(3) 268
Selection for low and high aspartic acid and glutamine in sugar beets ... 12(2) 152
Chemical control of Cercospora leaf spot in sugar beets ... 12(1) 43

HerrGM
**Herron, G. M.**
Effect of plant spacing and fertilizer on yield, purity, chemical constituents and evapotranspiration of sugar beets in Kansas.
I. Yield of roots, purity, percent sucrose and evapotranspiration ... 12(8) 686
Effect of plant spacing and fertilizer on yield, purity, chemical constituents and evapotranspiration of sugar beets in Kansas.
II. Chemical constituents ... 12(8) 699

Hey GL
**Hey, G. L.**
The control of weeds in sugar beet by an Endothal/Propham mixture applied at drilling ... 12(8) 672

HillFJ
**Hills, F. J.**
Marginal nitrogen deficiency of sugar beets and the problem of diagnosis ... 12(6) 476
Response of sugar beet to date of planting and infection by yellows viruses in northern California ... 12(3) 210

HogaGJ
**Hogaboam, G. J.**
Effect of temperature during anthesis and seed maturation on yield and germinability of sugar beet seed ... 12(7) 545

HunnaD
**Hunnam, D.**
The control of weeds in sugar beet by an Endothal/Propham mixture applied at drilling ... 12(8) 672

IsomWH
**Isom, W. H.**
Postemergence weed control in sugar beets under California conditions ..... 12(7) 564

JohnJR
**Johnson, J. R.**
An improved paper chromatography method of the determination of raffinose and kestose in beet root samples ..... 12(5) 449
Insecticide residue in sugar beet by-products ..... 12(3) 255
The development of control charts for package weights ..... 12(2) 163

JohnRC
**Johnson, Ronald C.**
A survey of sugar beet nematode in beet growing areas of the Utah-Idaho Sugar Company ..... 12(1) 64

JoneEC
**Jones, E. Clark**
Low raw sugar crystallization in connection with affination ..... 12(4) 288

JursiF
**Jursic, F.**
Cultural and pathogenic studies of an isolate of *Cercospora beticola* Sacc..... 12(6) 485

KelleH
**Keller, Harold**
Ion exclusion purification of sugar juices ..... 12(5) 363

LangWH
**Lange, W. H., Jr.**
Response of sugar beet to date of planting and infection by yellows viruses in northern California ..... 12(3) 210

LeetDD
**Leethem, D. D.**
Control of yeasts in sucrose syrup by control of syrup pH ..... 12(4) 359

LillCE
**Lilly, C. E.**
Effects of defoliation and reduction of stand on yield of sugar beets in southern Alberta ..... 12(3) 192
The sugar beet nematode, *Heterodera schachtii* Schmidt, in southern Alberta ..... 12(2) 148

LoomRS
**Loomis, R. S.**
Restitution of growth in nitrogen deficient sugar beet plants ..... 12(8) 657
Marginal nitrogen deficiency of sugar beets and the problem of diagnosis..... 12(6) 476
Interrupted nitrogen nutrition effects on growth, sucrose accumulation and foliar development of the sugar beet plant ..... 12(4) 309
Response of sugar beet to date of planting and infection by yellows viruses in northern California ..... 12(3) 210

ON FOR SEED SIZE IN MONOGERM — VARIETIES — DOXTCW-62
IES FOR DEVELOPING RESISTANT — VARIETIES — MCFAJS-63
— VARIETY CROSSES IN SUGAR BEETS (BETA — HELMRH-63
— VARIETY CROSSES IN SUGAR BEETS (BETA — HELMRH-63
— VARIETY CROSSES IN SUGAR BEETS (BETA — HELMRH-63
URE, NITROGEN FERTILIZATION, — VARIETY, AND HARVEST DATE ON ROOT YIE — WOOLDG-62
FFECTS OF ROOT DIFFUSATES OF — VARIOUS NEMATODE-RESISTANT AND-SUSCEP — PRICEC-63
AZOLIUM SALTS IN DETERMINING — VIABILITY OF SUGARBEET POLLEN — HECKRJ-63
HIGHLY — VIRULENT STRAINS OF CURLY TOP VIRUS I — BENNCW-63
IRULENT STRAINS OF CURLY TOP — VIRUS IN SUGAR BEET IN WESTERN UNITED — BENNCW-63
S A MEASURE OF RESISTANCE TO — VIRUS YELLOWS — FIFEJM-63
ING AND INFECTION BY YELLOWS — VIRUSES IN NORTHERN CALIFORNIA — HILLFJ-62
LAGOONING AND TREATMENT OF — WASTE WATER — BARRWW-62
CHLOROPROPENES IN IRRIGATION — WATER — WARRLE-63
ONING AND TREATMENT OF WASTE — WATER — BARRWW-62
POSTEMERGENCE — WEED CONTROL IN SUGAR BEETS UNDER CAL — BAYEDE-63
CIAL RESULTS WITH TILLAM FOR — WEED CONTROL IN SUGAR BEETS — ANTOGJ-62
DOTHAL (TD-66) ON CONTROL OF — WEEDS IN SUGAR BEETS — BECKCF-62
THE CONTROL OF — WEEDS IN SUGAR BEET BY AN ENDOTHAL/PR — HUNNAD-64
BULK SUGAR STORAGE— — WEIBULL SILO — WOODSA-62
NS IN THE PROBLEM OF PACKAGE — WEIGHT CONTROL — ROUNHG-62
AL AND GENETIC VARIANCES FOR — WEIGHT PER ROOT AND SUCROSE PERCENT — HELMRH-63
F CONTROL CHARTS FOR PACKAGE — WEIGHTS — JOHNJR-62
— WET SCREENING OF SUGAR CRYSTALS FROM — WESTRR-62
ENT YIELD OF FIELD BEANS AND — WHEAT — THURLD-63
— WINTER PROTECTION OF PILED SUGAR BEET — DEXTST-63

CONTROL OF YEASTS IN SUCROSE SYRUP BY CONTROL OF LEETDD-63
ASURE OF RESISTANCE TO VIRUS YELLOWS FIFEJM-63
OCCURRENCE OF YELLOWS RESISTANCE IN THE SUGAR BEET MCFAJS-63
OF PLANTING AND INFECTION BY YELLOWS VIRUSES IN NORTHERN CALIFORNI HILLFJ-62
YIELD AND QUALITY OF SUGAR BEETS AS A STOCKR-63
HESIS AND SEED MATURATION ON YIELD AND GERMINABILITY OF SUGAR BEET SNYDFW-63
ULTURAL PRACTICES WITH FINAL YIELD AND QUALITY OF SUGAR BEETS FRIERE-63
OF NITROGEN FERTILIZATION ON YIELD AND QUALITY OF SUGAR BEETS SCHMWR-63
OF PHOSPHATE APPLICATION ON YIELD AND QUALITY OF SUGAR BEETS ROMSSD-63
SOIL TESTS AND ON SUBSEQUENT YIELD OF FIELD BEANS AND WHEAT THURLD-63
ON AND REDUCTION OF STAND ON YIELD OF SUGAR BEETS IN SOUTHERN ALBE LILLCE-62
OF SUGAR BEET IN KANSAS. I. YIELD OF ROOTS, PURITY, PERCENT SUCRO FINKRE-64
SITION OF SUGAR BEET TISSUE, YIELD, PERCENT SUCROSE, AND APPARENT DAVIJF-62
NT SPACING AND FERTILIZER ON YIELD, PURITY, CHEMICAL CONSTITUENTS FINKRE-64
NT SPACING AND FERTILIZER ON YIELD, PURITY, CHEMICAL CONSTITUENTS FINKRE-64
TY, AND HARVEST DATE ON ROOT YIELDS AND SUCROSE CONTENT OF SUGAR B WOOLDG-62
GROWTH RATE OF YOUNG SUGAR BEET ROOTS AS A MEASURE O FIFEJM-63
QUIREMENTS FOR PRODUCTION OF ZOOSPORES BY APHANOMYCES COCHLIOIDES SCHNCL-63
